ABOUT OUR COMPANY

5Care Network Group is a home health care provider. We transfer a wide range of services from hospital to patient's home with their families. We called it **5CARE**.

These services include personal care, nursing care, medical management, and rehabilitation in a holistic care.

We endure health promotion and preserve patient health at home.

The organization prides itself on providing specialized, high-quality and evidence-based multidisciplinary home care

Innovation in 5CN FMC

a. Virtual Care

5CN FHC HHC is committed to deliver high quality home health care by connecting its clients and healthcare providers by FMC's smart App and virtual medicine.

5CN FHC uses mobile solutions to ensure easy access to health care, and to prevent unwanted hospital visits. Telehealth solutions enable us to manage virtually the following conditions:

- Consultation services.
- Chronic diseases management.
- Pediatric care.
- Stroke care.
- Patient & caregiver consultation and education.
- Tele-rehab care

b. Remote Patient Monitoring

5CN FMC's technology & solutions enable monitoring of our patients in their homes. We will use digital technology and monitoring devices for each specific patient to maintain their health and independence. Tracking healthcare statistics for our patients is very crucial to enhance care delivery in efficient and effective approach. FMC is providing complete solution and support to ensure high quality clinical care.

Our devices are FDA approved and can remotely monitor:

- Blood Pressure.
- ECG monitoring.
- Thermometer.
- Heart Rate.
- SPO2
- Blood Glucose.

Home Hemodialysis Program

One of the most trusted home dialysis providers

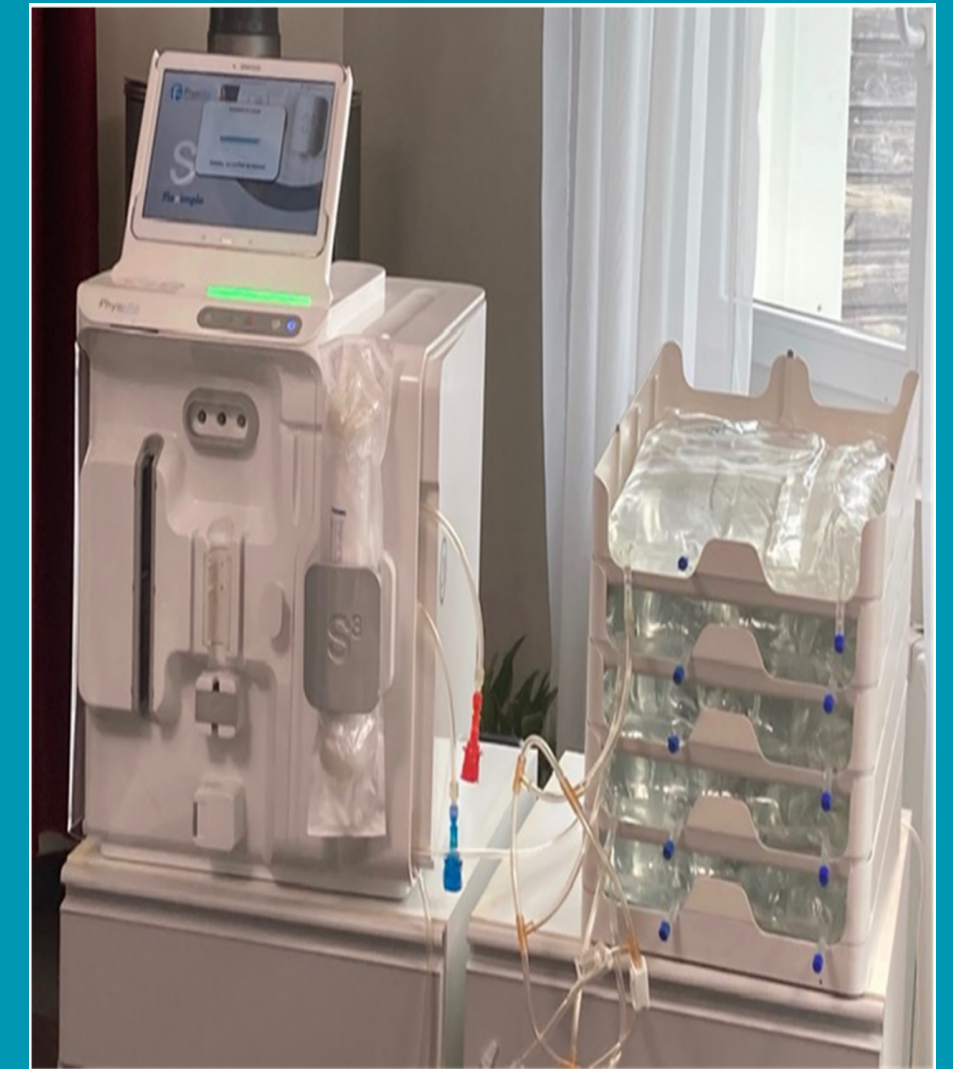

We Provide :

- **Conventional Dialysis** at home (Using Fresenius machine)
- **Portable HHD** (Using NexStage & Physidia machine)

FMC provides home hemodialysis utilizing up-to-date technology (NexStage & Physidia S3 Monitor – SFDA/MOH approved) and through experienced medical and nursing staff.

Comprehensive care for all hemodialysis patient by utilizing chronic disease management program.

We can accommodate a high volume of patient to provide highly efficient and cost-effective services at home.

Type of Home Hemodialysis Modality

- ❖ **Conventional Home Hemodialysis (HHD)** – done three times a week for three to five hours. It is like in-center hemodialysis (IHD), but done at home.
- ❖ **Short Daily Home Hemodialysis (SDHHD)** – done five to seven times a week, for two to four hours per session.
- ❖ **Nocturnal Home Hemodialysis (NHHD)** – done three to seven times per week at night during sleep, for six to ten hours.

Comparison Table

	Home IHD	Hospital IHD
Cost	Same cost session to session but less hospital complication cost	Additional transportation cost
Survival	Better survival due to better clearance and less infection risk	Less survival compare to home IHD
Quality of Life	Better work and sexual performance	No quality of life advantage
Infection	Patient has his own machine no risk for viral hepatitis or HIV transition	Risk of machine: Viral hepatitis or HIV infection

EXPERT MULTIDISCIPLINARY TEAM
